

STEPROS

Pump Filter

Technical Specifications

- Polypropylene and Schedule 40 PVC construction
- Filter removes solids larger than 1/8"
- 10.9 ft² effective filter screen surface area

Features

- Self-cleaning filter chamber
- Superior pump protection
- Reduced maintenance burden

STEPROS' pump filter is designed to provide a steady flow of filtered effluent to the pump by filtering out solids larger than 1/8". This filter works with STEPROS' self-cleaning vault to minimize the need for filter cleaning.
